Suggested citation: Global Nutrition Report. 2022 Global Nutrition Report: Stronger commitments for greater action. Bristol, UK: Development Initiatives, 2022

The *2022 Global Nutrition Report* dataset contains all commitments registered via the Nutrition Accountability Framework (NAF) Commitment Registration Form up to 15 March 2022, 11:59pm GMT. These commitments are part of the *2022 Global Nutrition Report* analysis.

This folder contains four CSV (comma separated values) files:

- **GNR2022_codebook.csv** contains information on each variable appearing in the datasets, including a description of the variable, the corresponding question from the registration forms, and data type (numeric, binary or text)
- **GNR2022_organisations.csv** dataset contains the stakeholder organisations data
- **GNR2022_commitments.csv** dataset contains the commitment level data
- **GNR2022_goals.csv** dataset contains the commitment goal level data

The three datasets (GNR2022_organisations.csv, GNR2022_commitments.csv, GNR2022_goals.csv) contain corresponding identifier (ID) variables that can be used to merge commitment goals with corresponding commitments and stakeholder organisations. See GNR2022_codebook.csv for details.

Where commitments were submitted in a language other than English, the relevant variables have been translated into English. The original submission in the non-English language is available as part of these documents.

All commitments in the *2022 Global Nutrition Report* dataset have been used in the *2022 Global Nutrition Report* as submitted in their unverified form. For the purposes of analysis for the report, some variables were cleaned and standardised. These additional variables are available as part of the datasets in this folder.

The GNR host organisation (Development Initiatives) is responsible for the management and maintenance of the NAF dataset and any query related to the data should be directed to naf@globalnutritionreport.org.
