

CSO Tracking Table 2018

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
Action Contre la Faim (ACF)			
Financial	Nutrition-specific total (US\$): 53,000,000	No response	No response
	Nutrition-sensitive total (US\$): 107,000,000	No response	
Non-Financial	Launch a multiyear international campaign to stop children dying from severe acute malnutrition (SAM).	Reached commitment	Reached commitment Basis for assessment: Reached commitment in 2015 GNR
Catholic Agency for Overseas Development (CAFOD)			
Financial	No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Non-Financial	Scale up nutrition-sensitive livelihoods programs.	No response	No response
Comic Relief			
Financial	Nutrition-specific total (US\$): 8,500,000	US\$3,458,497	Reached commitment Basis for assessment: Exceeded financial commitment in 2016 Global Nutrition Report.
	Nutrition-sensitive total (US\$): No commitment	US\$6,464,229 ¹	

¹ Represents full value of grants with a nutrition-sensitive component, as opposed to the exact amount that is allocated to said activities.

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
Non-Financial	No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Civil Society Alliance Bangladesh			
Financial	Nutrition-specific total (US\$): No commitment Nutrition-sensitive total (US\$): No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Non-financial	No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
	New commitment post 2013 N4G: To scale up multi-sectorial and multi-stakeholders engagement to scale up nutrition specific and sensitive intervention in Bangladesh		
Concern Worldwide			
Financial	Nutrition-specific total (US\$): 25,300,000 Nutrition-sensitive total (US\$): 91,400,000	Concern Worldwide have already fulfilled, and exceeded their 2013 N4G financial commitment. However, as a continued commitment to invest in nutrition, in 2017 Concern Worldwide spent US\$27,693,599 (22,625,490 Euros) towards nutrition-specific interventions. XE Euro to USD (1=1.224) rate as on 24 April 2018 has been applied.	Reached commitment Basis for assessment: Exceeded financial commitment made to 2020.

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
Non-financial	No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Hellen Keller International (HKI)			
Financial	Nutrition-specific total (US\$): No commitment Nutrition-sensitive total (US\$): No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Non-Financial	1. Building evidence base related to nutrition-sensitive interventions, including bio fortified crops.	1. Helen Keller International (HKI) has continued its commitment to build the evidence base and test program models related to nutrition sensitive interventions. This includes pilot programs for biofortified millet and sorghum in Mali and orange-fleshed sweet potato (OFSP) in Burkina Faso. We will also refine and improve our homestead food production (EHFP) model in a number of Africa and Asia Pacific countries. (a.) On-track and on-going. HKI continues to make good progress on all non-financial commitments related to building the evidence base. During 2017 we concluded a four-country study in Africa through IFPRI (Canadian government funded) to assess the impact of our enhanced homestead food	On course Basis for assessment: Studies on homestead food production and gender have been completed or are ongoing, and the food fortification project in Burkina Faso was completed in 2015.

Nutrition for Growth (N4G) commitment to 2020	Reported progress in 2017–2018	2018 Assessment	
	<p>2. Support large-scale food fortification efforts in Burkina Faso (funding from government of Taiwan) folate and vegetable cooking oil with vitamin A.</p>	<p>production (EHFP) program model. This included RCTs being carried out in Burkina and Tanzania, and proof of concept studies in Cote d'Ivoire and Senegal. Publications with IFPRI are now being prepared to share the findings of the results. A joint HKI/IFPRI seminar was held in Washington DC in December 2017 during which impact research findings from Burkina Faso RCT were released. Thereafter, the results were discussed by an Experts Panel comprising senior HKI staff, the Director General of the Health and Nutrition Bureau from Global Affairs Canada and the Assistant to the USAID Administrator and Deputy Coordinator for Feed the Future In Asia Pacific, we continue to conduct RCTs on our EHFP model, including new studies in Cambodia (with Bill and Melinda Gates Foundation funding to look at the impact of different gender strategies within the EHFP design) and Myanmar (with private family foundation funding to expand the impact beyond nutrition to include livelihood).</p> <p>2. In addition, we continue to support large scale food fortification efforts in Burkina Faso (funding from Government</p>	

Nutrition for Growth (N4G) commitment to 2020	Reported progress in 2017–2018	2018 Assessment
	<p>of Taiwan) to complete the final phase of a multi-year investment which commenced in 2006 to fortify wheat flour with iron folate and vegetable cooking oil with vitamin A. (a.) This project was successfully completed in 2015. The total population reached in Burkina by these fortified staple food products is estimated to be over 16 million for vitamin A fortified cooking oil and 16.6 million for iron folate fortified wheat flour. This nears national coverage of Burkina’s population of 17.6 million. Over the lifetime of the project, a total of 31 vegetable oil producers (1 large and 30 small) and two large-scale wheat millers participated and received training as well as basic supplies to fortifying these foods with essential micronutrients.</p>	
<p>New commitments post 2013 N4G: 3. HKI will continue to search out new private funding to support more nutrition initiatives.</p>	<p>On-track and on-going.</p> <p>During 2017, HKI in Asia Pacific HKI initiated a major new Enhanced Homestead Food Production (EHFP) project (including RCT trial mentioned above) in Myanmar funded by a private family foundation new to nutrition. Additionally, in 2017 two other projects funded by two private foundations also</p>	

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
	<p>4. HKI will continue to play a leadership role in global nutrition initiatives.</p>	<p>new to nutrition were initiated in Cote d'Ivoire (the "Transforming Education in Cocoa Communities" (TRECC) initiative to support Nutrition and Early Childhood Development) and in Tanzania (the Eleanor Crook Foundation to support RCT research on effectiveness of mobile approaches for nutrition behavior change). The funding for these three new projects amounts to approximately US\$ 7 million.</p> <p>In addition, HKI secured a new stream of funding from GiveWell, another private foundation funder, to support vitamin A supplementation in selected African countries; this will amount to over \$7million for 3 years.</p> <p>On-track and on-going. In addition, HKI's senior leadership continues to play leadership roles in Scaling Up Nutrition (SUN) movement. This includes, for example, continued involvement of our Senior Vice President Programs on SUN Civil Society's Steering Group.</p>	
Interaction			
Financial	Nutrition-specific total (US\$): 300,000,000	\$3,171,412.28	

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
	Nutrition-sensitive total (US\$): 450,000,000	\$30,510,465.08	Reached commitment Basis for assessment: Exceeded financial commitment made to 2020 since GNR 2017.
Non-Financial	No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Mercy Corps			
Financial	Nutrition-specific total (US\$): No commitment Nutrition-sensitive total (US\$): No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Non-Financial	1. Improve the nutritional access of 500,000 pregnant/lactating women and children under age 2. 2. Protect 50,000 children under age 5 from stunting. 3. Save the lives of 20,000 children under the age of 5 through the promotion of appropriate feeding, childcare, and health-seeking practices.	1. From January 2017 to December 2017, Mercy Corps has improved nutritional access of 155,012 pregnant/lactating women and children under age 2 in Uganda, Niger, Ethiopia and Yemen. 2. From January 2017 to December 2017, Mercy Corps has reached 185,158 children under the age of 5 in Niger, Ethiopia and Yemen with interventions to prevent stunting. 3. Mercy Corps has been unable to measure this, to date, due to the complexities of measuring lives saved	On course Basis for assessment: Despite a noted inability to measure commitment 3, has exceeded commitment 1 and 2.

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
		across countries with varied interventions.	
Micronutrient Initiative [Nutrition International]			
Financial	<p>Nutrition-specific total (US\$): 10,000,000</p> <p>The Micronutrient Initiative's strategic plan (2013–2018) commits MI to advancing integrated, innovative and sustainable solutions to reduce vitamin and mineral deficiencies with the goal of reaching hundreds of millions of women, newborns and children every year.</p> <p>At the 2013 Nutrition for Growth conference, MI pledged CAD \$10 million in private sector (philanthropic, corporate, etc.) funding to nutrition programs, with an emphasis on zinc supplementation.</p>	No response	No response
	Nutrition-sensitive total (US\$): No commitment	Not applicable	
Non-financial	Act as secretariat for the New Micronutrient Forum in June 2014.2. Protect 50,000 children under age 5 from stunting.	No response	No response
One Campaign

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
Non-financial	<p>1. Campaign for governments and other partners to publish credible and timely information on nutrition spending, progress, and planning.</p> <p>2. Shape a rigorous accountability mechanism to monitor all commitments made on June 8, 2013.</p> <p>3. Assess and report publicly on progress made against these commitments at key moments between now and the Brazil-hosted follow-up event in 2016.</p>	No response	No response
Oxfam			
Financial	<p>Nutrition-specific total (US\$): No commitment</p> <p>Nutrition-sensitive total (US\$): No commitment</p>	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Non-Financial	<p>1. Gendered Enterprise and Markets (GEM) program develops food markets and systems to enable mainly women small producers to invest in their own food security.</p> <p>2. Increase the use of tools to monitor the impact of emergency and food security/livelihoods work. In areas with Global Acute Malnutrition (GAM) is above 15%, use Mid-Upper Arm Circumference (MUAC) to refer infants and children to services for treatment. Will also use this data to improve targeting criteria and advocacy. Through systematic referrals, we will increase access to treatment of Severe Acute Malnutrition (SAM) and Moderate Acute Malnutrition (MAM).</p>	<p>No response</p> <p>No response</p>	No response

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
Save the Children International			
Financial	Nutrition-specific total (US\$): 85,000,000 Nutrition-sensitive total (US\$): 590,000,000	US\$7,821,799 US\$68,231,502	Off course Basis for assessment: Has not reached the nutrition-specific average annual spending (12.1M) nor the nutrition-sensitive annual average (84.2M) needed to reach the original commitment.
Non-financial	1. Chair SUN Civil Society Network (CSN).	Save the Children continues to host the Scaling Up Nutrition Civil Society Network (SUN CSN). The SUN CSN now represents over 2500 national, regional and international organisations and networks spanning multiple sectors, and 40 national civil society alliances. The SUN CSN's strategy for the period focuses on effective advocacy and implementation; evidence and learning; coordination and accountability; through the multi-stakeholder approach and addressing the multiple drivers of malnutrition, such as gender, equity and conflict. In addition, Save the Children has held the role of vice-chair of the network since June 2014. A key achievement in 2017 was Save the Children's work in supporting the SUN CSN Secretariat to secure funding, as	On course Basis for assessment: Continues to hold the role of vice-chair of SUN CSN and has collaborated with GAIN through various networks and platforms.

Nutrition for Growth (N4G) commitment to 2020	Reported progress in 2017–2018	2018 Assessment	
	<p>2. Partnership with the Global Alliance for Improved Nutrition (GAIN), Secure Nutrition on Innovations in Nutrition Sensitive Agriculture.</p>	<p>well as strengthening of regional groups and collaboration across civil society alliances.</p> <p>The nutrition-sensitive agriculture competition was successfully delivered with GAIN and the World Bank in 2014. Save the Children continues to work with GAIN in a number of ways, including: collaboration through the SUN Movement (GAIN host the SUN Business Network); coordination and implementation with nutrition-specific funders and funding platform; programmatic partnerships, including the recently ended BADUTA programme in Indonesia; and as contributors to the global adolescent technical interest group. The partnership between Save the Children and the World Bank Group continues to strengthen at Global, regional and country level, through in joint research collaboration; programming and advocacy. We have also increased our engagement and policy efforts with a specific focus on fragile states.</p>	

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
SUN CSO Alliance Zambia			
Financial	Nutrition-specific total (US\$): No commitment Nutrition-sensitive total (US\$): No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Non-Financial	1. Raise the profile of nutrition on the national agenda through awareness raising, constructive dialogue, and advocacy with stakeholders including the government of the Republic of Zambia, cooperating partners, and the private sector.	1. CSO SUN Alliance contributed to raising the profile on nutrition on the national development agenda through capacity building training that were delivered to members of the alliance, media houses and Members of Parliament on issues of Sustainable Diets and the food systems. The presentation justified the need for diversification of our food system on both production and consumption. This has resulted in a number of members of parliament having a better understanding of issues on sustainable diets and the food system and the diversification agenda and as a result, they have now developed lobby and advocacy campaign issues to take to the floor of the house for debate. The media are equally equipped to report accurately on the subject matter. CSO SUN also facilitated an engagement with members of parliament and their communities in	On course Basis for assessment: Advocated extensively for nutrition budgeting and food systems within government, although language of original commitment is vague.

Nutrition for Growth (N4G) commitment to 2020	Reported progress in 2017–2018	2018 Assessment
	<p>2. Contribute to improved leadership and accountability in the fight against malnutrition in Zambia.</p>	<p>which members of parliament cascade the agenda on sustainable diets and the food system to their communities thereby raising the agenda for the diversification of the food system and helping in the reduction of the malnutrition levels in the local communities.</p> <p>2. CSO SUN participated in national decision making by influencing budgetary framework. Budget analysis was conducted and presented before the Expanded Committee on Estimates and Expenditure. The presentation highlighted the national budget allocations to nutrition and how they have remained significantly low.</p> <p>CSO SUN appeared before the Committee on Health, Community Development and Social Services and made submissions on Dietary related Non Communicable Diseases (NCDs) and the Social Protection (Social Cash Transfer – SCT). Key recommendation of the way forward in addressing NCDs and improving the SCT scheme were highlighted.</p>

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
UK Biotech and Biological Science Research Council			
Financial	Nutrition-specific total (US\$): No commitment Nutrition-sensitive total (US\$): No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Non-Financial	1. Work with the Global Food Security (GFS) program, a cross-government research coordination mechanism, to scale up engagement on nutrition-related research. 2. Work with CGIAR's HarvestPlus to organize a UK and international scientific workshop on next-generation bio fortified crops and bioavailability.	1. Following a workshop and policy and practice note (Insight) on Paris-compliant healthy food systems, we have now set up a taskforce to develop future scenarios on meeting the Paris Agreement and the SDGs by 2050 at a local to global level, which will result in a set of potential interventions in the food system. In addition, we have just launched a £1.8M interactive workshop ("sandpit") to address the question 'How can we transform our food system so it is based on healthy and sustainable diets and how would this impact on sustainable and resilient food production and supply?' We hope to make some awards in autumn 2018. 2. Nutritional enhancement of crops featured in the scope of the RCUK-CIAT Newton-Caldas Fund Sustainable Tropical Agricultural Systems Programme. This fund (£2.9 million from the UK funders) aims to maximise food security by 'improving human and	On course Basis for assessment: Commitment 2 was reached in previous years; significant achievements have been made for the other two commitments (although original commitment language is vague).

Nutrition for Growth (N4G) commitment to 2020	Reported progress in 2017–2018	2018 Assessment
	<p>3. Work with research councils and other partners to develop a networked approach to nutrition and health.</p>	<p>farmed animal nutrition' through research on tropical forages and pulses. (https://bbsrc.ukri.org/funding/filter/2017-sustainable-tropical-agricultural-systems-programme/)</p> <p>3. BBSRC and MRC have each committed up to €500k to form a joint UK pot of €1million to support UK researchers participating in the HDHL JPI joint action on 'nutrition and the epigenome'. The aim of this call is to support transnational, collaborative research projects to gain a better understanding of the diet-epigenome relationships and their effect on human health. The call closed on 12 April 2018.</p> <p>Following the publication of the Review of Nutrition and Human Health Research in July 2017, BBSRC, MRC and NIHR are working in partnership to establish the UK NRP which will develop and realise an implementation plan for the review recommendations, and provide a more coordinated approach to nutrition research to maximise impact in relation to national and international policies and activities. The first meeting of the UK NRP took place on 12 April 2018.</p>

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
		The Agriculture Nutrition and Health (ANH) Academy Scientific Symposium took place in Kathmandu, Nepal on 11–13 July, during which BBSRC hosted a satellite session, which brought UK and international nutrition experts and policy makers together, to help identify potential topics of research for nutrition within a lower middle-income country (LMIC) context.	
Vegan Society			
Financial	Nutrition-specific total (US\$): No commitment Nutrition-sensitive total (US\$): No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
Non-Financial	Use evidence and put it in action on good nutrition practices (for maternal, infant, and young child feeding and overall healthy diet), and enriching the diet nutrient density of young children and pregnant and lactating women.	We have employed a full time registered dietitian who has ensured that our resources are updated and evidence based. She regularly provides advice to vegans on good nutrition practices. We have shared these resources via our website, media and outreach events. We have developed specific resources for pregnancy and breastfeeding, under-fives, and 5–10 year olds (as well as 11–18 year olds and older adults), enriching the diet nutrient density of young children and pregnant and lactating women.	On course Basis for assessment: Allocated resources towards providing professional nutrition advice.

Nutrition for Growth (N4G) commitment to 2020		Reported progress in 2017–2018	2018 Assessment
World Vision			
Financial	Nutrition-specific total (US\$): 435,000,000	US\$66,499,935	On course Basis for assessment: Has exceeded the nutrition-specific average annual spending (62.1M) for the original commitment but falls short on the nutrition-sensitive annual average (107.4M).
	Nutrition-sensitive total (US\$): 752,000,000	US\$98,539,478	
Non-Financial	No commitment	Not applicable	None Basis for assessment: No 2013 N4G commitment made
